CUTTING EDGE SEPTIC SYSTEM FOR SUFFOLK COUNTY

August 20th, 2015 – Nesconset was the first area to receive a new septic system provided by Hydro-Action, Leslie Kennedy (R-Nesconset) was first on the scene bright in the morning to witness the installation of this new high tech system. This system is environmentally friendly and it uses extended aeration activated sludge process in which microorganisms remain in the treatment process for a longer period of time.

(Leslie Kennedy, Pete Sabo, and Joseph Densieski)

This new system will alleviate the issue of nitrogen seeping into Long Island's natural aquifers. "I look forward to environmental advantages that this septic system will bring Long Island, going forward I am confident that this system will bring healthier and cleaner drinking water to our residents" said Legislator Kennedy.

(Leslie Kennedy at the Septic System Press Conference)

This is the first of 19 systems that will be installed all over Suffolk County. The hope is that these systems will lead to cleaner more healthy drinking water in the years to come. All of these systems were donated free of charge by the manufacturers and come with 5 years of upkeep and maintenance.

For any questions about this system or other community events or issues feel free to contact Leslie Kennedy's office at (631) 854-3735, and don't hesitate to reach us online at Leslie.kennedy@suffolkcountyny.gov or [facebook.com/legislatorlesliekennedy](https://www.facebook.com/legislatorlesliekennedy).
