

New York State Minimum Channel Programming of Interoperability for Public Safety Mobile and Portable Radios

- The following channels are licensed by Federal Communications Commission rule for mobile and portable users for agencies with a valid FCC Part 90 license and further licensing is not required. These include: *VCALL10*, *VTAC11-14*, *UCALL40/UCALL40D*, *UTAC41-43/UTAC41-43D*
- Any and all other channels require the user to have an FCC license or be authorized through agreement with a licensee before use.
- For ease of use on the fire ground, please make sure to program the channel names according to standard
- PERMITTED USE
 - Interoperable communications, such as multiagency and/or multijurisdictional responses.
- PROHIBITED USES
 - Dispatching a single agency or as substitution for internal agency operations;
 - Single agency tactical communications;
 - Routine fire ground communications
- TECHNICAL PARAMETERS
 - For VHF-Low channels, only analog transmissions are permitted.
 - For VHF-HI and UHF channels, only analog, narrowband transmissions are permitted.
 - The use of a radio programmed “time out timer” is mandatory, with transmissions not permitted to exceed 120 seconds (2 minutes) each.

90.2 AUTHORIZED CHANNELS FOR INTEROPERABLE COMMUNICATIONS

CHANNEL NAME	RECEIVE FREQ (MHz)	RECEIVE CTCSS (Hz)	TRANSMIT FREQ (MHz)	TRANSMIT CTCSS (Hz)	NOTES
VCALL10	155.7525	CSQ	155.7525	156.7
