

# COVID-19 Surveillance in Wastewater at Suffolk County Sewage Treatment Plants (STP)

- Current Trends at the County’s Large/Regional STPs:
    - Bergen Point – Substantial Decrease
    - Selden – No New Data
- Note: STP categorization is determine by number of properties served. Large STPs serve over 6,000 properties.

## Important SARS-CoV-2 related links:

- [NYSDOH Wastewater Variant Data](#)
- [NYSDOH Wastewater Concentration Dashboard](#)

- At our larger/regional STPs, virus levels have decreased at Bergen Point. At our smaller/local STPs, virus levels have decreased at Port Jefferson, Riverhead, Twelve Pines, Woodside, Parkland, SUNY Stonybrook, and Northport.
- This is a collaborative project between Suffolk County Department of Health, New York State Department of Health and the Wastewater Surveillance Network. We’re working together to monitor the presence of the SARS-CoV-2 virus in our community. This is one of many methods we’re using to help you understand the risk level in your community, so you can make informed personal decisions.

**Note**  
 The levels of the COVID-19 virus (specifically SARS-CoV-2) in Suffolk county are still detectable, but they are much lower than what we saw during the worst of the pandemic.
